DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10 and 43-51, drawn to a light source for reducing variation in light intensity across a beam of light projected therefrom, and a method for reducing the variation in light intensity across a beam of light projected from a light source, classified in class 362, subclass 555.
 - II. Claims 11-20, drawn to a light source generating a homogeneous light beam, classified in class 362, subclass 558.
 - III. Claims 21-31 and 52-57, drawn to an opacity monitor for measuring an opacity of gases in an open path of gases using a light source that reduces variation in light intensity across a projected beam, classified in class 356, subclass 435.
 - IV. Claims 32-42, drawn to an opacity monitor for measuring an opacity of gases in an open path of gases using a light source that projects a homogeneous light beam, classified in class 356, subclass 438.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I-IV have separate utilities such as reducing variation in light intensity, generating a homogeneous light beam, and sensing the opacity of gases in an open path of gases. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michelle Nguyen whose telephone number is 703-305-2771. The examiner can normally be reached on M-F 8:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Russ Adams can be reached on 703-308-2847. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
